It does not contain all the information you should consider before investing in our securities. Important information is incorporated by reference into this prospectus. Overview

We are a biotechnology company specializing in the development, processing, manufacturing and provision of cell and gene therapies ("CGTs") through point-of-care solutions. We have historically operated through two independent business platforms: (i) a point-of-care cell therapy ("POC") platform and (ii) a Contract Development and Manufacturing Organization ("CDMO") platform, which provided contract manufacturing and development services for biopharmaceutical companies (the "CDMO Business"). Through the POC platform, our aim is to further the development of CGTs, including Advanced Therapy Medicinal Products ("ATMPs") through collaborations, partnering, joint ventures, and in-licensing with other pre-clinical and clinical-stage biopharmaceutical companies and research and healthcare institutes to bring such ATMPs to patients. These therapies span a wide range of treatments including, but not limited to, cell-based immunotherapies, therapeutics for metabolic diseases, neurodegenerative diseases and tissue regeneration. We out-license these ATMPs, thus far primarily through joint venture ("JV") agreements, with regional partners including pharmaceutical and biotech companies as well as research institutions and hospitals. These regional partners have cell therapies in clinical development and are to whom we also provide processing services, manufacturing know-how, assay services, licensing, regulatory assistance, pre-clinical studies, intellectual property services, and co-development services (collectively "POC Development Services") to support their activity in order to reach patients in a point-of-care hospital setting. Currently, our POC Development Services constitute the entirety of our revenue from the POC platform. Through the CDMO platform, we had focused on providing contract manufacturing and development services for biopharmaceutical companies. We continue to provide such processing, manufacture, and development, services in Israel and South Korea.

On February 2, 2020, we entered into a Stock Purchase Agreement (the "Purchase Agreement") with GPP-II Masthercell LLC ("GPP" and together with the Company, the "Sellers"), Masthercell Global Inc. ("Masthercell") and Catalent Pharma Solutions, Inc. (the "Buyer"). Pursuant to the terms and conditions of the Purchase Agreement, on February 10, 2020, the Sellers sold 100% of the outstanding equity interests of Masthercell to Buyer (the "Masthercell Sale") for an aggregate nominal purchase price of \$315 million, subject to customary adjustments. After accounting for GPP's liquidation preference and equity stake in Masthercell as well as SFPI - FPIM's interest in MaSTherCell S.A., distributions to Masthercell option holders and transaction costs, we received approximately \$126.7 million.

Activities in the POC platform include a multitude of cell therapies including, but not limited to, cell-based immunotherapies, therapeutics for metabolic diseases, neurodegenerative diseases and tissue regeneration. We are establishing and positioning our POC business in order to bring point-of-care therapies to patients in a scalable way through our collaborations, and JV partners active in autologous cell therapy product development, including facilities in Germany, Austria, Greece, the U.S., Korea, Japan, Singapore, Latin America, the UK, Spain, Israel, Russia and China. We believe that each of our regional collaborators or JV partners represents a revenue and growth opportunity upon regulatory approval. In addition, our trans-differentiation technology, which demonstrates the capacity to induce a shift in the developmental fate of cells from the liver or other tissues and transdifferentiating them into "pancreatic beta cell-like" Autologous Insulin Producing ("AIP") cells for patients with Type 1 Diabetes, acute pancreatitis and other insulin deficient diseases, represents a unique opportunity. This technology, which has yet to be proven in human clinical trials, has shown in pre-clinical animal models that the human derived AIP cells produce insulin in a glucose-sensitive manner. This trans-differentiation technology is licensed by Orgenesis Ltd. (the "Israeli Subsidiary") and is based on the work of Professor Sarah Ferber, our Chief Scientific Officer and a researcher at Tel Hashomer Medical Research Infrastructure and Services Ltd. in Israel. The development plan calls for conducting additional pre-clinical safety and efficacy studies with respect to diabetes and other potential indications prior to initiating human clinical trials.

With respect to this trans-differentiation technology, we own or have exclusive rights to ten (10) United States and eight (8) foreign issued patents, five (5) pending applications in the United States, thirty-three (33) pending applications in foreign jurisdictions, including Europe, Australia, Brazil, Canada, China, Eurasia, Israel, Japan, South Korea, Mexico, and Singapore, and one (1) international Patent Cooperation Treaty patent applications. These patents and applications relate, among others, to (1) the trans-differentiation of cells (including hepatic cells) to cells having pancreatic β -cell-like phenotype and function and to their use in the treatment of degenerative pancreatic disorders, including diabetes, pancreatic cancer and pancreatitis, and (2) scaffolds, including alginate and sulfated alginate scaffolds, polysaccharides thereof, and scaffolds for use for cell propagation, trans-differentiation, and transplantation in the treatment of autoimmune diseases, including diabetes.

We conduct the activities of our POC platform through our wholly-owned subsidiaries, including Orgenesis Maryland Inc. (the "U.S. Subsidiary"), Orgenesis Belgium SRL (the "Belgian Subsidiary") and Orgenesis Ltd, and Orgenesis Korea ("the Korean Subsidiary").

We believe that, in-order to provide the optimal service to our customers, we need to have a global presence. Our POC platform is focused on providing our POC Development Services toward a goal of allowing us to be able to bring new products to patients faster and in a more cost-effective way. We target the international market as a key priority through our network of facilities that provide development, manufacturing and logistics services, utilizing our advanced quality management system and experienced staff. All of these capabilities offered to third-parties are utilized for our internal development projects, with the goal of allowing us to be able to bring new products to patients faster and in a more cost-effective way.

The CDMO platform was historically operated through (i) majority-owned Masthercell Global (which consisted of the following two subsidiaries: MaSTherCell S.A. in Belgium, and Masthercell U.S., LLC in the United States), and (ii) wholly-owned Atvio Biotech Ltd. in Israel, and 94.12% owned CureCell Co., Ltd. in South Korea (was renamed Orgenesis Korea). Each of these subsidiaries has unique know-how and expertise for manufacturing in a multitude of cell types.

We operated our POC and CDMO platforms as two separate business segments.

PLAN OF DISTRIBUTION

The selling stockholders, which as used herein includes donees, pledgees, transferees or other successors-in-interest selling shares of common stock or interests in shares of common stock received after the date of this prospectus from a selling stockholder as a gift, pledge, partnership distribution or other transfer, may, from time to time, sell, transfer or otherwise dispose of any or all of their shares of common stock or interests in shares of common stock on any stock exchange, market or trading facility on which the shares are traded or in private transactions. These dispositions may be at fixed prices, at prevailing market prices at the time of sale, at prices related to the prevailing market price, at varying prices determined at the time of sale, or at negotiated prices.

The selling stockholders may use any one or more of the following methods when disposing of shares or interests therein:

- ordinary brokerage transactions and transactions in which the broker-dealer solicits purchasers;
- block trades in which the broker-dealer will attempt to sell the shares as agent, but may position and resell a portion of the block as principal to facilitate the transaction;
- purchases by a broker-dealer as principal and resale by the broker-dealer for its account;
- an exchange distribution in accordance with the rules of the applicable exchange;
- privately negotiated transactions;
- short sales effected after the date the registration statement of which this prospectus is a part is declared effective by the SEC;
- through the writing or settlement of options or other hedging transactions, whether through an options exchange or otherwise;
- broker-dealers may agree with the selling stockholders to sell a specified number of such shares at a stipulated price per share;
- a combination of any such methods of sale; and
- any other method permitted by applicable law.

The selling stockholders may, from time to time, pledge or grant a security interest in some or all of the shares of common stock owned by them and, if they default in the performance of their secured obligations, the pledgees or secured parties may offer and sell the shares of common stock, from time to time, under this prospectus, or under an amendment to this prospectus under Rule 424(b)(3) or other applicable provision of the Securities Act amending the list of selling stockholders to include the pledgee, transferee or other successors-in-interest as selling stockholders under this prospectus. The selling stockholders also may transfer the shares of common stock in other circumstances, in which case the transferees, pledgees or other successors-in-interest will be the selling beneficial owners for purposes of this prospectus.

In connection with the sale of our common stock or interests therein, the selling stockholders may enter into hedging transactions with broker-dealers or other financial institutions, which may in turn engage in short sales of the common stock in the course of hedging the positions they assume. The selling stockholders may also sell shares of our common stock short and deliver these securities to close out their short positions, or loan or pledge the common stock to broker-dealers that in turn may sell these securities. The selling stockholders may also enter into option or other transactions with broker-dealers or other financial institutions or the creation of one or more derivative securities which require the delivery to such broker-dealer or other financial institution of shares offered by this prospectus, which shares such broker-dealer or other financial institution may resell pursuant to this prospectus (as supplemented or amended to reflect such transaction).

The aggregate proceeds to the selling stockholders from the sale of the common stock offered by them will be the purchase price of the common stock less discounts or commissions, if any. Each of the selling stockholders reserves the right to accept and, together with their agents from time to time, to reject, in whole or in part, any proposed purchase of common stock to be made directly or through agents. We will not receive any of the proceeds from this offering. Upon any exercise of the Warrants by payment of cash, however, we will receive the exercise price of the Warrants.

The selling stockholders also may resell all or a portion of the shares in open market transactions in reliance upon Rule 144 under the Securities Act, provided that they meet the criteria and conform to the requirements of that rule.

The selling stockholders and any underwriters, broker-dealers or agents that participate in the sale of the common stock or interests therein may be "underwriters" within the meaning of Section 2(11) of the Securities Act. Any discounts, commissions, concessions or profit they earn on any resale of the shares may be underwriting discounts and commissions under the Securities Act. Selling stockholders who are "underwriters" within the meaning of Section 2(11) of the Securities Act will be subject to the prospectus delivery requirements of the Securities Act.

To the extent required, the shares of our common stock to be sold, the names of the selling stockholders, the respective purchase prices and public offering prices, the names of any agents, dealer or underwriter, any applicable commissions or discounts with respect to a particular offer will be set forth in an accompanying prospectus supplement or, if appropriate, a post-effective amendment to the registration statement of which this prospectus is a part.

In order to comply with the securities laws of some states, if applicable, the common stock may be sold in these jurisdictions only through registered or licensed brokers or dealers. In addition, in some states the common stock may not be sold unless it has been registered or qualified for sale or an exemption from registration or qualification requirements is available and is complied with.

We have advised the selling stockholders that the anti-manipulation rules of Regulation M under the Exchange Act may apply to sales of shares in the market and to the activities of the selling stockholders and their affiliates. In addition, to the extent applicable we will make copies of this prospectus (as it may be supplemented or amended from time to time) available to the selling stockholders for the purpose of satisfying the prospectus delivery requirements of the Securities Act. The selling stockholders may indemnify any broker-dealer that participates in transactions involving the sale of the shares against certain liabilities, including liabilities arising under the Securities Act.

We will pay all expenses of the registration of the shares of common stock pursuant to the Registration Rights Agreement, including, without limitation, SEC filing fees and expenses of compliance with state securities or "blue sky" laws; provided, however, that each selling stockholder will pay all underwriting discounts and selling commissions, if any and any related legal expenses incurred by it. We will indemnify the selling stockholders against certain liabilities, including some liabilities under the Securities Act, in accordance with the Registration Rights Agreement, or the selling stockholders will be entitled to contribution. We may be indemnified by the selling stockholders against civil liabilities, including liabilities under the Securities Act, that may arise from any written information furnished to us by the selling stockholders specifically for use in this prospectus, in accordance with the Registration Rights Agreement, or we may be entitled to contribution.

We have agreed with the selling stockholders to keep the registration statement of which this prospectus is a part effective until the earlier of (i) such time as all of the shares covered by this prospectus have been disposed of pursuant to and in accordance with the registration statement or (ii) the date on which all of the shares may be sold without restriction pursuant to Rule 144 of the Securities Act.
